

## **CLAIMS:**

### **What Is Claimed Is:**

1. A drilling fluid additive comprising: talc, graphite and at least one carrier.
2. The drilling fluid additive of Claim 1 further comprising uintaite.
3. The drilling fluid additive of Claim 1 wherein said carrier comprises polypropylene glycol.
4. The drilling fluid additive of Claim 1 wherein said carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
5. The drilling fluid additive of Claim 2 wherein said talc comprises from about 1% to about 20% of said additive, said graphite comprises from about 1% to about 30% of said additive, said carrier comprises from about 50% to about 90% of said additive and said uintaite comprises from about 1% to about 40% of said additive.
6. The drilling fluid additive of Claim 1 wherein said carrier is selected from a group consisting of polypropylene glycol, polyethoxylated glycol, polybutylene glycol, polyethylene glycol, propylene glycol, polyester polyol-poly(oxyethylene-oxy) propylene glycol, polyoxyalkylene glycol ethers and mixtures thereof.

7. The drilling fluid additive of Claim 1 wherein said uintaite is treated with a second carrier.
8. The drilling fluid additive of Claim 7 wherein said second carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
9. The drilling fluid additive of Claim 1 wherein said second carrier comprises an ethoxylated glycol.
10. A drilling fluid additive manufactured by a method comprising: admixing talc, graphite and at least one carrier.
11. The drilling fluid additive of Claim 10 wherein said carrier is first admixed with said talc and then the graphite is admixed.
12. The drilling fluid additive of Claim 10 further comprising admixing an uintaite with said carrier, talc and graphite mixture.
13. The drilling fluid additive of Claim 10 wherein said carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
14. The drilling fluid additive of Claim 12 wherein said uintaite is pre-treated with a second carrier prior to being admixed to said carrier, talc and graphite mixture.

15. The drilling fluid additive of Claim 12 wherein said talc comprises from about 1% to about 20% of said additive, said graphite comprises from about 1% to about 30% of said additive, said carrier comprises from about 50% to about 90% of said additive and said uintaite comprises from about 1% to about 40% of said additive.
16. The drilling fluid additive of Claim 10 wherein said second carrier is selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
17. A method of manufacturing a drilling fluid additive, said method comprising:  
admixing talc with at least one carrier; and  
admixing graphite to said talc and carrier mixture.
18. The method of Claim 17 further comprising admixing an uintaite with said talc, carrier and graphite mixture.
19. The method of Claim 18 wherein said uintaite is pretreated with a second carrier prior to admixing said uintaite to said talc, carrier and graphite mixture.
20. The method of Claim 19 wherein said first and second carriers are selected from a group consisting of oils, esters, glycols, cellulose, olefins and mixtures thereof.
